

Wilkin Jones

(913) 954-8237 | official@wilkinjones.com | [LinkedIn](#) | [Portfolio](#)

Summary

Aspiring Data Scientist with hands-on experience using SQL, Python, and analytics to support data validation and visualization. Adept at reviewing data quality, conducting exploratory analyses, and ensuring compliance with privacy guidelines. Passionate about applying structured and unstructured data insights to enhance healthcare registries and support AI model validation initiatives in a collaborative setting.

Education

Brigham Young University - Idaho

Dec 2021 - Apr 2026

Bachelor of Science, Data Science

- **Coursework:** Statistical Methods, Data Intuition & Insights, Database Design

Projects

Heart Disease Case Study | https://www.wilkinjones.com/Heart_Casestudy.html

Jun 2025 - Jul 2025

- **Tools:** Python, XGBoost, Scikit-learn, Pandas, Matplotlib, Seaborn
- **Goal:** Classify whether a patient has heart disease based on clinical measurements
- **Outcome:** Achieved an F1 score of 0.84 on the validation set and 0.75 on the holdout set

Bike Rentals Prediction Case Study | <https://www.wilkinjones.com/>

- **Tools:** Python, Keras, Scikit-learn, Pandas, Matplotlib
- **Goal:** Predict hourly bike rentals using time-based and COVID-era features
- **Outcome:** Achieved 89% R² accuracy with a dropout-regularized neural net

Pawesome Database Enhancement | <https://www.wilkinjones.com/>

- Enhanced database structure for a fictional pet service company.
- Implemented schema normalization and SQL queries to enhance analytics capabilities.

Baseball Relationships Study | <https://www.wilkinjones.com/>

- Analyzed historical data to uncover trends in player performance and team outcomes.
- Developed queries and visualizations which drew strategic insights for team-building.

Technical Skills

- **Languages/Tools:** Python, SQL, Excel, Power BI, SSMS, Tableau
- **Techniques:** Statistical Analysis, Visualization, Machine Learning (TensorFlow/Keras), ETL Processes, AI/ML Concepts, Clinical Registry Data, Healthcare Data Standards
- **Other:** Strong Communication, Project Ownership, Cross-Functional Collaboration
